Aman Rai

New Delhi

Profile Summary

• Data Analyst with 2+ years of experience, skilled in SQL, Python, data analysis, and data visualisation.

• Translated complex datasets into actionable insights, supporting data-driven business and product decisions.

Technical Skills

Tools and Technology: Python, SQL, Power BI, Excel

Libraries: NumPy, Pandas, Matplotlib, Seaborn

Data Analysis: Data Cleaning, Visualisation, Statistical Analysis

Developer Tools: VS Code, Jupyter Notebook

Experience

Genpact February 2024 – Present

Data Analyst Gurugram, Haryana

 \bullet Improved risk prediction accuracy by 15% through advanced data analysis and model evaluation.

- Built and optimised SQL queries to manage large datasets, ensuring high data quality.
- Developed Power BI dashboards to visualise insights, enabling data-driven business and product decisions.
- Collaborated with cross-functional teams to integrate analytical findings into strategic initiatives.
- Identified historical trends and actionable patterns to support policy and predictive model development.
- Applied Excel and predictive modeling techniques for catastrophe modeling and risk assessment.

Projects

Superstore Annual Report Analysis | Excel, Data Cleansing, Dashboard | Project Link

August 2024

- Conducted detailed sales data analysis to identify revenue-driving products and regions.
- Highlighted key focus areas, enabling data-driven strategies to boost annual revenue by actionable insights.
- Cleaned and transformed raw data for accurate reporting and visualisation in Excel dashboards.

HR Analytics Dashboard | Excel, Power BI, Data Analysis and Visualization | Project Link

July 2024

- Collected, cleaned, and analysed HR datasets to uncover patterns behind high employee attrition.
- Designed interactive Power BI dashboards to visualise attrition trends and workforce metrics.
- Provided actionable insights to HR leadership for retention strategies and workforce planning.

Retail Store Sales Data Analytics | Power BI, Excel, Forecasting and Analysis | Project Link

June 2024

- Developed comprehensive sales dashboards to track performance across products and regions.
- Implemented forecasting models to predict future sales trends and optimise inventory management.
- Delivered actionable insights to support strategic decision-making and increase operational efficiency.

Education

Guru Gobind Singh Indraprastha University

August 2019 - August 2023

Bachelor of Technology in Biotechnology: 8.8 CGPA

New Delhi

Achievements and Recognition

- Achieved SQL Gold Badge on HackerRank
- Received Best Performer New Joining Award at Genpact (July 2024)
- Secured AIR 28 in IPU CET

Interests

• Data Science

• Business Intelligence
